

CORONAVIRUS UPDATE

Links Labels & Tapes is closely monitoring the worldwide impacts of the coronavirus. At present, we are experiencing minimal impact in our supply chain or our ability to deliver products to our customers.

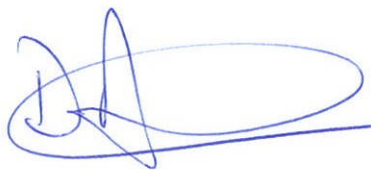

We are continually receiving updates from our supply chain and all suppliers are currently operating as normal.

The situation, however, is fluid and could change at short notice. Accordingly, we are ensuring that all potentially impacted facilities are updating their pandemic response plans.

As an interim precaution Links Labels & Tapes has increased the levels of stock of raw materials to negate or reduce the impact of lengthening lead times.

One thing that is certain is your team at Links Labels & Tapes will work tirelessly to minimise any potential threat to supplies during this period of uncertainty.

Our Customer Services team will be in regular contact as always, if you have any particularly sensitive products or customers that you would like to specifically discuss we would be happy to explore the options open to us.
